

Gentle. Effective. Skin Rejuvenation with the AcuLift™ MicroPen

Microneedling effectively treats fine lines, wrinkles, acne scars, improves skin texture and color, and dramatically enhances the effectiveness of skincare products.

Visible results begin on the first day and continue for weeks afterward. As collagen levels continue to build up, your skin becomes more luminous and the complexion more even.

Your acupuncturist is uniquely qualified to perform microneedling due to their in-depth knowledge of East Asian Medicine. Combining this ancient medicine with modern technology enhances health and beauty from the inside out.

Body acupuncture addresses the internal causes of aging and organ imbalances, which often appear on the face. Relaxing, restorative acupuncture treatments can be combined with microneedling, drastically enhancing the effects.

THE ACULIFT MICROPEN IS PART OF THE ACULIFT MICROPEN SYSTEM

THIS SYSTEM INCORPORATES ALL ORGANIC, VEGAN DOCTOR FORMULATED SERUMS AND PRE AND POST CARE PRODUCTS FOR THE BEST POSSIBLE RESULTS.

GENTLE . EFFECTIVE. SKIN REJUVENATION

- Natural solution
- Little downtime
- Improves the appearance of wrinkles on the face and neck as well as the tone and texture of the skin
- Safe for all skin types
- Organic skincare products

Before Treatment:

If desired, topical anesthetic is applied before treatment to provide light numbing.

Gentle Treatment:

Physician formulated, organic, and vegan serums which are prepared for your skin's individual needs will be applied. The AcuLift™ MicroPen is then used to create controlled microchannels, eliciting your body's healing response. This will remodel and rejuvenate your skin to provide a younger, firmer, and more radiant appearance.

Post Treatment:

Following treatment your skin may appear pink or slightly red, like a mild sunburn. This typically disappears after 12-24hrs. You will receive a patient aftercare kit to accelerate your recovery and results.

Results:

Are sometimes apparent after one treatment and will improve over a series of 3-6 monthly treatments. Results will continue to progress for several months after your last treatment. Results can last up to 5 years!
